

## McCarter Partners with The Activate Fellowship

09.24.2021

McCarter & English's Government Contracts and Global Trade Group is a proud partner of Activate, a 501(c)(3) nonprofit organization founded and organized to empower scientists to reinvent the world by bringing their research to market. Activate works between government and the private sector, transforming scientists into high-impact entrepreneurs through a fellowship that guides them along every step of the journey. The Activate Fellowship provides two years of funding and connects fellows with the resources, knowledge, and networks they need to succeed. The fellowship does not take equity in fellows' startups. Partner Zack Hadzismajlovic is honored to provide Activate Fellows, and their nascent businesses, one-on-one assistance and guidance on US government funding and controls placed on non-US investment.
