

Deborah L. Nagle, PhD

Patent Agent | Boston | 617.449.6525
dnagle@mccarter.com

Intellectual Property | Patents | Life Sciences

Dr. Deborah Nagle has more than 10 years of experience as a patent professional. She practices in all areas of biotechnology patent law, including U.S. and foreign patent prosecution, patent validity opinions, freedom-to-operate opinions and due diligence evaluations.

Prior to joining the firm, Deborah conducted postdoctoral research at the University of Pennsylvania. She worked for Millennium Pharmaceuticals, Inc. as a scientist, designing and implementing model systems across disease areas for use as surrogates for human disease. She was also a Scientist/Project Manager at Hypnion, Inc., involved in design and implementation of proprietary Genomics/Target Discovery Programs.

Deborah's work has been presented at international meetings, and has been published in peer reviewed journals. She has research experience in multiple therapeutic areas and in a range of technologies used in the drug discovery industry. She is also an inventor of several patents.
